## MYFRIDGE MF V5M MILK COOLER FOR COFFEE MACHINES

### The coffee-making problem-and its solution: Milk cooler MF V5M

Cappuccino, Caffè Latte, Latte Macchiato - hardly surprising, coffee lovers don't want to go without the variations of their favourite drink any more. And they have come to expect them in café or restaurant.

Wherever you go, you will find coffee machines that deliver the desired drink at the touch of button.

There's just one drawback, however: many of those delicious coffee varieties require milk, and its refrigeration often presents a problem. Luckily, that problem is easy to solve. The DOMETIC cooling specialists have put their minds to it and developed a compact milk refrigeration and storage solutions-cost-efficient, powerful, and ideal for professional use. And what's more, it's design blends harmoniously with that of modern coffee machines.

The refrigerator can cool products to a maximum of 30°C under ambient temperature.

In Cold mode: the lowest temperature is 4°C to avoid food and drink getting freeze

### Clean chic: milk cooler /mini refrigerator for semi-professional use

#### Milk refrigeration the elegant way

- Cooling up to 30°C below ambient temperature
- Temperature restriction at +4°C under cold mode
- Elegant milk cooler for commercial use and office use
- For coffee machines with self-priming pump and nozzle for cappuccino
- For using with up to two 1 litre bags of milk
- Sealed openings for milk tube on both sides
- Interior lighting inside

#### Perfect down to the last detail

Clean and fast: Insert the tube and start the process

A highlight for the service team: The interior lighting is standard

The simplicity of changing sides: Sealable tube outlet right and left

Deposit included: Room for two 1-litre tetrapacks
